# DATA LINK +

On the software are shown all the informations about the instruments and calibrations, like slope and offset. It is possible to view all saved data in graphic form, to see the trend, or in table form.

It is also possible to export datas in Excel and in PDF.

On the top right corner the real time view allows to check measurement directly on the PC.

Multilanguage: English - Italian - French - German - Spanish - Czech.

And then there are a lot of functions for the remote control of the instruments, like data saving and memory reset.
