

LABTEX

All Steel Structure

Advantages: 10 years' lifetime, easier installation, more excellent weight capacity.

Material:

Cabinet: made of cold-rolled steel or galvanized steel plate coated with Akzonobel powder. Double structure with sound-absorption material inside.

Accessories: 128mm U-type S.S handle/long steel grab handle one-time formed by CNC machine. DTC 3-joints/self closing drawer slide without noise.

Steel corner bench (JH-SF019)

Steel central bench (JH-SF040)

Steel central bench with American shelf (JH-SF022)

Steel central bench with normal shelf (JH-SF001)

Steel H-frame central bench (JH-SF041)

Steel C-frame central bench (JH-SF008)

Wood And Steel Structure

Advantages: good weight capacity, high cost performance, fashionable design

Material:

C-frame: 60x40x1.5/40x40x1.5mm steel pipe coated with epoxy resin powder with adjustable feet.

Cabinet: made of 18mm melamine E1 grade chipboard/MDF/plywood with 2mm PVC edging.

Accessories: 128mm U-type S.S handle/long aluminum alloy grab handle coated with powder ; 304 S.S Hydraulic hinge ; DTC 3-joints/self closing drawer slide without noise.

Wood C-frame wall bench(JH-WS015)

Wood C-frame central bench(JH-WS023)

Wood H-frame central bench(JH-WS020)

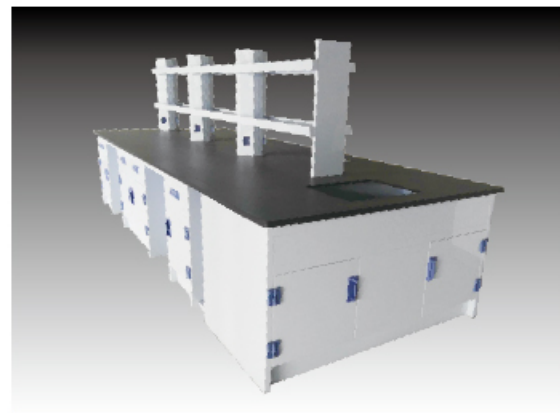

Wood O-frame wall bench(JH-WS019)

Stainless Steel/PP Structure

Stainless steel structure(JH-SS010)

PP central bench(JH-PP001)

Safety Storage Cabinet

Size: 1090x460x1120/1090x460x1650/860x860x1650/1090x860x1650mm(LxWxH)

JH-SC007

safety cabinet for corrosive liquid

JH-SC008

Safety cabinet for flammable liquid

JH-SC009

Safety cabinet for combustible liquid

Balance Table

Triple shock absorption model

Size: 900x600x900mm(LxWxH)

JH-BT001

TPU double shock absorption

JH-BT002

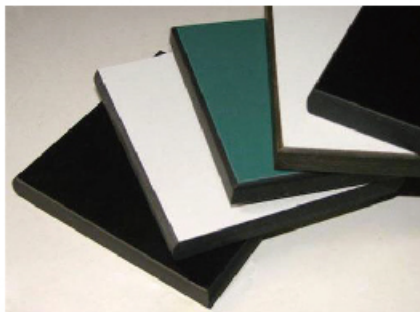

80mm marble worktop

JH-BT003

Designed for million scale

Given various requirements of customers containing budget, quality etc, we recommend suitable worktop to every user.

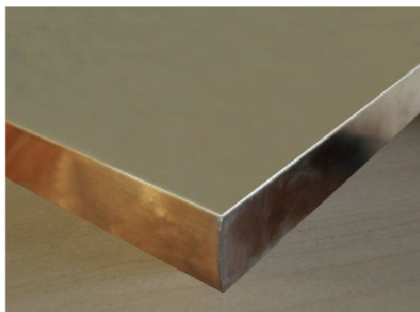

Phenolic resin laminate worktop

Epoxy resin worktop

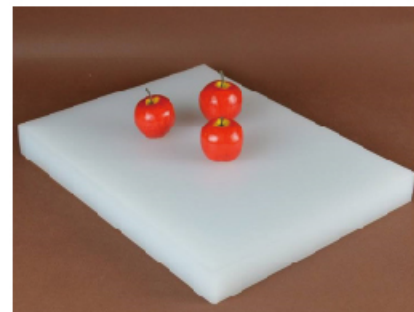

Ceramic worktop

Stainless steel worktop

Trespa Toplab

Polypropylene worktop

Performance Comparison	Phenolic Resin Laminate	Epoxy Resin	Ceramic	Stainless Steel	Trespa Toplab	Polypropylene
Composition	Chemical resistant film, overlay paper, deco paper, Kraft paper	epoxy resin, quartz sand, catalysts, curing agents and pigments	Natural Silicate	Stainless steel	Refined wood fiber, hydroxybenzen, aldehyde resin	Propylene, ethylene
Max. Long term Heat Resistance	135°C	300°C	800°C	180°C	180°C	110°C
Chemical Resistance	Strong resistance against solvents, oxidants, and many acids	Strong resistance against solvents, bases, and most oxidants	Strong resistance against solvents, bases, oxidants and most acids	Strong resistance against solvents, bases, oxidants, and organic acids	Strong resistance against solvents, bases, and oxidants	Strong resistance against bases and most oxidants, Hydrofluoric acid
Chemical weaknesses	Sulfuric acid, nitric acid, sodium hydroxide	Sulfuric acid, nitric acid, hydrofluoric acid, potassium permanganate	Hydrofluoric acid	Mineral acids (hydroch-loric, sulfuric, nitric, phosphoric, hydrofluoric	Hydrofluoric acid	—
Thickness	12.7/16/19mm	16/19/25mm	20mm	20mm	12.7/16/19mm	15mm
